

The Meltman™ processing unit can be added to the Mold Man 8200 to:

- Double the melt and flow rate
- Run two materials at the same time
- Run different molding parameters at the same time
- Swap units for quick material changes
- Have a backup while servicing

**MELTMAN**™ Product Specifications

Pump	Servo electric driven precision metering gear pump
Melt Capacity	Up to 10 kg per hr. / 22 lbs per hr.
Melt Temperature	Up to 245° C / 475° F
Injection Pressure	2-50 bar / 25-750 psi
Injection Pressure Control	Closed loop
Shot Size	5-200 grams / .02-7.0 ounces typically

**MOLDMAN**™ 8200 Options

The Fillman™ material hoppers easily mount atop Meltman melt units for quick, clean, hassle-free material loading. Easily hooks up to traditional pellet filling machines.
